### W-001 DEFINITIONS

<u>ACCOUNT:</u> An account is a separate service and billing record established by the Utility for each parcel to which it provides Water Service. The account is identified by a number, contains information such as the customer's name and address, the size of service connection/meter and any amounts due to or from the customer.

<u>APPLICANT:</u> An "applicant" is an individual, firm, corporation or agent of any individual, firm or corporation applying for Water Service from the Utility.

<u>BILLING Service Charge</u> means a monthly charge applied to each account that is calculated to reimburse the utility for just and reasonable expenses associated with billing and maintenance of utility accounts and records.

<u>BRANCHED SERVICE EXTENSION</u> means two or more service extensions diverging from a single service connection.

<u>BUSINESS HOURS</u> means 8:00am – 5:00pm Monday through Friday excluding national holidays.

<u>COMMERCIAL WATER SERVICE</u> means Water Service that is used primarily for business purposes and not residential purposes.

<u>COMMERCIAL UNIT</u> Means a contiguous commercial space within a structure served by a single service connection that includes potable water and sanitary sewer facilities and is capable of being individually leased to a commercial or industrial enterprise.

<u>CONDOMINIUM</u> means a multi-unit structure subject to a declaration recorded under the Horizontal Property Regimes Act, AS 34.07 or the Uniform Common Interest Ownership Act of 1994, AS 34.08

<u>CROSS CONNECTION</u> means any connection, physical or otherwise, between a potable water supply and any non-potable water source for which it may be possible for the other substance to enter into any part of the potable water system under any condition.

<u>CROSS CONNECTION CONTROL</u> means protection of the public water supply by controlling or eliminating the actual or potential cross-connection.

<u>CURB STOP</u> means the valve by which the utility can turn on or off utility service to a parcel

<u>CUSTOMER</u> means a person whose application for Water Service has been approved and is receiving Water Service from the Utility. <u>CUSTOMER CHARGE</u> means a fixed monthly charge per account to recover costs associated with rendering monthly billing statements, maintaining customer accounts, and covering costs associated with operation of the Utility supply and distribution system.

<u>DATE OF ACCEPTANCE</u> means the date on which a water main passes final inspection by the Utility and is available for Water Service.

of billed charges by the du DISCONTINUANCE mean	means an account for which the Utility has not received payment

### W-018 MAIN EXTENSIONS

### A. Extension of Existing Facilities

A request for extension(s) of existing facilities shall be initiated by petition signed by the owner or owners of 2/3 of the proposed benefiting properties. The Utility, at its discretion, may accept or deny the petition depending on its ability to supply the proposed extension. All line extensions must conform to the most current edition of Oasis Water's design criteria.

### B. Extension Costs

Any main extension to be constructed by others shall be subject of an individually negotiated line extension agreement between the Utility and the applicant, approved by the Regulatory Commission of Alaska. Said agreement shall be signed by both parties and any required fees paid before construction of said extension may begin. Terms of the agreement shall be negotiated individually, and based on plans and specifications approved by the Utility. Details including but not limited to responsibility for as-built plans, surveying, engineering, inspection, governmental approvals and performance bonds will be determined in each individual line extension agreement.

Ownership of all water main lines and service connections within the rights-of- way or utility easements shall accrue to the Utility after construction of the water system has been completed and inspected and the Utility has accepted the project. The system will thereafter be maintained by the Utility, subject to the two year bond against defects in workmanship and materials.

Costs associated with main extensions shall be either paid directly by the petitioner or shall be paid via a Voluntary Special Assessment negotiated between the petitioner and the utility on a case by case basis as approved by the Regulatory Commission of Alaska.

### C. Service Extension to Non-Contiguous Service Areas

Owners of parcels lying outside or discontiguous to the Utility's Certificated Service Area, may request extension of Water Utility Service by petition of 100% of affected parcel owners. The Utility may, at its discretion deny the request or proceed by producing a cost estimate for the necessary Water Infrastructure and apply to the Regulatory Commission of Alaska to expand its Certificated Service Area to include the requesting parcels. The Utility may, at its discretion, offer to finance the infrastructure through a Private Special Assessment agreement subject to RCA approval and Rule W-020, or require the applicant to construct and contribute all Water Infrastructure required to service the parcel in accordance with the Utility's tariff and all State and Federal Drinking Water Regulations

approval and Rule W-02 Water Infrastructure req	Private Special Assessment agreement subject to RCA 20, or require the applicant to construct and contribute all juired to service the parcel in accordance with the Utility's ederal Drinking Water Regulations.

Existing street names, sewer mains, and proposed connection/extension locations.  6. Reference in a general note that all construction will adhere to the Standard Construction Specifications.  7. Include the engineer's firm name, address and telephone number.  e. Evidence that the applicant has obtained all permits and paid all fees required to construct or remove that portion of the connection that will be or is located in public rights-of-way. The developer, owner or contractor shall acquire all permits and pay all fees established by any governmental unit as a condition for the installation, construction or removal of a service connection or a service extension. If the governmental unit requires the Utility to obtain the permit and accept responsibility, the developer, owner or contractor shall reimburse the Utility for all costs incurred to obtain the permit and provide a two-year guarantee secured by a bond to the Utility sufficient to cover possible damages or liabilities.  f. The applicant for a permit to install or remove a service connection or service line extension under a road right-of-way shall guarantee the service connection installation for two (2) years from the date of connection.

	g. The Utility shall issue a connection permit and collect the Service Connection/Extension deposit provided in W-026.8 if it finds that the permit application conforms to this subsection and the construction proposed in the application conforms to this tariff, the Design Criteria of the Anchorage Water & Wastewater Utility and applicable law. Once the Utility issues the connection permit the applicant is authorized to proceed with the construction of the service connection, service extension, or both.  3. Inspection of Construction No service connection or service extension (including newly constructed service connections or service extensions as well as repaired, modified or abandoned service connections or extensions) may be backfilled until they have been inspected and approved by the Utility or its designated representative. The customer shall schedule the Utility's inspection of a service connection or service extension at least twenty-four (24) hours in advance. The Utility will charge a separate inspection fee for each service connection, and for each service extension, inspected as provided in W-026.9. An inspection of a connection to Utility facilities shall be completed within three (3) working days after the customer requests that the Utility schedule the inspection.  The service connection will be approved at the conclusion of the inspection if the service connection conforms to W-019 of this tariff. If a service connection or service extension fails to pass inspection, it must be re-inspected until it passes inspection. A full inspection fee as provided in W-026.9 or actual cost to the utility shall be payable for each re-inspection, whichever is greater. If a service connection or service extension is installed and backfilled without Utility inspection and approval, the Utility may require proof that the service connection or service extension. Where the submission of engineered plans is required, the customer shall submit record drawings, signed and stamped by a professional engineer registered

Custom at reas	s to Utility Facilities hers or property owners on whose property Utility facilities are located shall conable hours grant access to properly identified utility employees. These s include but are not limited to meters, keyboxes, and water mains.
S. Cross C 1.	The purpose and scope of the cross connection control program is to protect the Utility's water supply from contamination by identification of cross-connection risks of each service connection. Some service connections may require the installation of one or more cross-connection control devices and assemblies. The customer(s) who are required to maintain backflow prevention devices and assemblies will be charged an annual fee, as provided in Section W-026-13.  The Utility will be responsible for determining the need for, approval of installation, and initial testing of all backflow prevention devices and assemblies. The Utility will be responsible for assuring that the assemblies and devices remain in place and functioning by requiring the periodic testing and reporting of these test results to the Utility.  No public water service connection to any premises shall be installed or maintained unless it is in accordance with the requirements of the cross connection protection of this tariff, Unified Plumbing Code and local amendments and 18 AAC 80.025. Service of water to any premises with a cross connection shall be discontinued if a back flow assembly device has not been installed, tested and maintained, or it is found that the backflow prevention device has been removed, bypassed or an unprotected cross connection otherwise exists on the premises. Service will not be restored until such conditions or defects are corrected in conformance with this tariff, Unified Plumbing Code and local amendments.  A customer shall permit a properly identified Utility representative to enter the customer's premises at all reasonable times for random testing and inspection of back flow prevention devices to ascertain that no cross connection contamination risk exists.
